PROFESSIONAL SUMMARY

Python Full Stack and Data Analytics professional with strong experience in building scalable web applications, automating data pipelines, developing Power BI dashboards, and implementing machine learning models. Skilled in Python, SQL, Django, and data visualization with a strong focus on performance optimization and business-driven insights.

TECHNICAL SKILLS

Programming: Python, C, Java (Basics)

Web Technologies: HTML, CSS, JavaScript

Frameworks & Tools: Django, Power BI, MS Excel, Git, VS Code

Databases: MySQL, PostgreSQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Data Concepts: Data Cleaning, Data Modeling, DAX, KPI Tracking, Automation, Debugging

PROJECTS

- **Web Scraping – Acko Drive Platform (Python, BeautifulSoup, Pandas):** Designed an automated data extraction pipeline scraping 5,000+ car listings. Implemented pagination handling, exception management, and validation checks to ensure 99% accuracy while reducing manual effort by 95%.
- **AI-Powered Resume to Portfolio Website Generator (HTML, CSS, JavaScript using Google Gemini and LangChain):** Designed and implemented an AI-driven application that automates the conversion of resumes into professional portfolio websites, leveraging Google Gemini through LangChain to generate structured HTML, CSS, and JavaScript with live preview and downloadable output.
- **Sales Performance & KPI Dashboard (Power BI, Python, MySQL):** Built interactive dashboards using DAX, optimized data models, and calculated measures to analyze revenue, growth trends, and regional performance, enabling data-driven decision-making.
- **Machine Learning – Diabetes Prediction (Python, ML Algorithms):** Developed Logistic Regression, Random Forest, and SVM models achieving 89% accuracy. Applied preprocessing, feature scaling, ROC analysis, and confusion matrix evaluation; improved pipeline execution time by 30%.
- **Smart Transport Services (Django, HTML, CSS, JavaScript):** Developed a full-stack web application integrating real-time traffic, location maps, and environmental data to recommend congestion-free routes and enhance user travel planning.
- **User Registration & Authentication System (Django, PostgreSQL):** Implemented secure user registration, login, and validation workflows demonstrating backend logic, database design, and full-stack development expertise.

INTERNSHIPS

- **Data Science Intern – Innomatics Research Labs** (May 14, 2025 – Present): Gaining hands-on experience in Python, MySQL, NumPy, Pandas, data visualization (Matplotlib, Seaborn, Power BI), statistics, and Machine & Deep Learning.
- **Data Analytics Intern – Trainity** (Mar 2025 – May 2025): Analyzed datasets using Python and Excel, performed data cleaning, and created visual insights to support business reporting.
- **Data Analytics Intern – Digital Lync** (Oct 2024 – Feb 2025): Worked with SQL, Python, and Power BI to solve analytical problems and develop dashboards aligned with business KPIs.
- **Python Full Stack Trainee Engineer – Palle Technologies** (Feb 2024 – Sep 2024): Built full-stack web applications using Django, REST principles, and PostgreSQL; gained hands-on experience in backend logic and deployment concepts.
- **Global Service Desk Program – NIIT Foundation** (Feb 2024 – Mar 2024): Acquired foundational knowledge in IT support operations, incident handling, and service management workflows.

EDUCATION

B.Tech – Civil Engineering, Annamacharya Institute of Technology and Sciences
Intermediate, ANM & BR Junior College

CGPA: 8.04
CGPA: 7.11

CERTIFICATIONS

Python Full Stack – Palle Technologies — Data Analytics – Digital Lync — Python & Java – HackerRank — Global Service Desk – NIIT Foundation
